## 01_authentication.feature

```
@auth
Feature: Rider authentication and onboarding
  As a new or returning rider
  I want to sign in with my phone number
  So that I can book rides with HOVR

  Background:
    Given the app is freshly installed
    And the device has an internet connection
    And I launch the HOVR Rider app

  @smoke
  Scenario: Splash screen leads to the landing page
    When the splash screen finishes loading
    Then I should see the landing screen
    And I should see the "Get Started" button

  Scenario: Navigate from landing to phone number entry
    Given I am on the landing screen
    When I tap "Get Started"
    Then I should see "Enter your phone number"
    And I should see "We'll text you a code to verify it."

  Scenario Outline: Phone number validation
    Given I am on the phone number screen
    When I enter phone number "<phone>"
    And I tap "Continue"
    Then I should see "<result>"

    Examples:
      | phone        | result                 |
      | 4165550123   | OTP verification page  |
      | 12345        | Invalid phone number.  |
      |              | Invalid phone number.  |

  @smoke
  Scenario: Verify OTP successfully
    Given I submitted a valid phone number "4165550123"
    And I am on the OTP verification page
    Then I should see "Enter the 6-digit code sent to you at +1 4165550123."
    When I enter the valid 6-digit code
    Then I should be signed in

  Scenario: Enter an invalid OTP
    Given I am on the OTP verification page
    When I enter the code "000000"
    Then I should see "Invalid verification code. Please try again."

  Scenario: Resend code countdown
    Given I am on the OTP verification page
    Then the "Resend code" button shows a countdown timer
    When the countdown reaches zero
    And I tap "Resend code"
    Then a new code is sent
    And the countdown restarts

  Scenario: Too many OTP requests
    Given I have requested OTP the maximum number of times today
    When I tap "Resend code"
    Then I should see "Too many OTP requests for today. Try again later."

  Scenario: Change phone number from OTP screen
    Given I am on the OTP verification page
    When I tap "I have a new phone number"
    Then I should return to the phone number screen

  Scenario: New rider completes profile
    Given I verified OTP as a new rider
    When I enter first name "Jane" and last name "Doe"
    And I tap "Continue"
    Then I should see "What's your email?"
    When I enter email "jane@example.com"
```

```
  And I tap "Continue"
  Then I should see the Terms of Service screen

Scenario Outline: Name validation
  Given I am on the name entry screen
  When I enter first name "<first>" and last name "<last>"
  And I tap "Continue"
  Then I should see "<message>"

  Examples:
    | first | last | message                  |
    |       | Doe  | Enter your first name    |
    | Jane  |      | Enter your last name     |
    | J@ne1 | Doe  | First name is not valid  |

Scenario: Empty email is rejected
  Given I am on the email entry screen
  When I tap "Continue" without entering an email
  Then I should see "Email field is empty"

Scenario: Terms must be accepted
  Given I am on the Terms of Service screen
  When I tap "Agree and continue" without checking the agreement box
  Then I should see "You must agree to the Terms of Service to continue."
  When I check the agreement box
  And I tap "Agree and continue"
  Then I should see "Do you have a referral code?"

Scenario: Skip referral code during onboarding
  Given I am on the referral code onboarding screen
  When I tap "Skip"
  Then I should see "Welcome to HOVR"
  And I should see "Ride now" and "I'll ride later"

Scenario: Redeem referral code during onboarding
  Given I am on the referral code onboarding screen
  When I enter referral code "FRIEND5"
  And I tap "Redeem Code"
  Then I should see "Referral code redeemed successfully!"

Scenario: Rider outside service region
  Given my current location is outside the HOVR service area
  When I finish onboarding
  Then I should see "We're not in your area... yet."
  When I tap "Get Updates"
  Then I am subscribed to launch notifications

Scenario: Notification permission prompt
  Given I completed onboarding
  And notification permission has not been granted
  Then I should see the notification permission screen
  When I deny the permission
  Then I should see "You have not allowed notification permission."
  And I should see "Open Settings"
```

## 02_home_and_trip_planning.feature

```
@home
Feature: Home screen and trip planning
  As a signed-in rider
  I want to plan a trip from the home screen
  So that I can quickly choose pickup and drop-off

  Background:
    Given I am signed in as a rider
    And location permission is granted
    And I am on the home screen

  @smoke
  Scenario: Home screen shows main navigation
    Then I should see the bottom navigation tabs "Ride", "Trips" and "Account"
    And I should see the "Where to?" search field
    And I should see the "Rideshare" and "Co-Commute" tabs

  Scenario: Swipe guide on first visit
    Given this is my first visit to the home screen
    Then I should see "Swipe the panel"
    When I swipe up on the panel
    Then I should see "Nice! Now swipe down to close it."
    When I swipe down on the panel
    Then I should see "You're all set"

  Scenario: Skip the swipe guide
    Given the swipe guide is displayed
    When I tap "Skip"
    Then the swipe guide is dismissed
    And it is not shown on the next launch

  Scenario: Open plan your trip
    When I tap "Where to?"
    Then I should see "Plan your trip"
    And the pickup field is prefilled with "Current location"

  Scenario: Search destination with autocomplete
    Given I am on the plan your trip screen
    When I type "Union Station" in the drop-off field
    Then I should see place suggestions
    When I select the first suggestion
    Then I should see the route preview

  Scenario: Recent searches
    Given I have previous searches
    When I open the plan your trip screen
    Then I should see the "Recent" section
    When I tap "Clear all"
    Then the recent searches list is empty

  Scenario: Set location on map
    Given I am on the plan your trip screen
    When I tap "Set location on map"
    And I drag the map to a new position
    Then I should see "Fetching address..."
    And the address field updates to the pinned location

  Scenario: Add and remove stops
    Given I am on the plan your trip screen with a destination
    When I tap "Add stop"
    Then I should see "Add stop 1"
    When I try to continue with an empty stop
    Then I should see "Select a stop or remove it to continue."

  Scenario: Location unavailable
    Given location services are disabled
    When I open the plan your trip screen
    Then I should see "Unable to fetch current location."

  Scenario: Use Home shortcut
    Given I have saved a "Home" place
    When I tap the "Home" shortcut
```

```
    Then the drop-off is set to my Home address

  Scenario: Add Home when not saved
    Given I have no saved Home place
    When I tap "Add Home"
    Then I should see the add new place screen

  Scenario: Schedule a ride for later
    Given I am on the plan your trip screen
    When I tap the time selector
    Then I should see "Choose a time"
    When I choose a pickup time 2 hours from now
    And I tap "Confirm and continue"
    Then the trip is planned for the selected time

  Scenario: Invalid scheduled time
    Given I am on the choose time screen
    When I choose a pickup time 5 minutes from now
    Then I should see "Choose a valid pickup time"

  Scenario: Pickup in unsupported area
    Given my pickup point is outside the service area
    When I request route options
    Then I should see "Pickup in not supported area"

  Scenario: No route found
    Given my destination has no drivable route
    When I request route options
    Then I should see "No route found for the destination!"
```

## 03_ride_booking.feature

```
@ride-booking
Feature: Ride booking
  As a rider
  I want to choose a ride type and request a driver
  So that I can get to my destination

  Background:
    Given I am signed in with a default payment method
    And I have selected a pickup and a destination

  @smoke
  Scenario: Choose a ride type
    Then I should see "Choose a ride"
    And each ride option shows a price and "Pickup in" ETA
    When I select a ride type
    Then the "Confirm" button shows the selected ride type

  Scenario: View fare breakdown
    Given I am on the choose a ride screen
    When I open the fare breakdown for a ride type
    Then I should see "Fare", "Tax" and "Est. Total"

  Scenario: No ride services available
    Given no ride services are available for this route
    Then I should see "No ride services available"

  Scenario: Booking without a payment method
    Given I have no payment methods
    When I tap confirm on a ride type
    Then I should see "Please add a payment method to continue booking your ride."

  Scenario: Confirm pickup spot
    Given I confirmed a ride type
    Then I should see "Set your pickup spot"
    When I drag the map to place the pin
    And I tap "Confirm pickup"
    Then I should see "Finding your driver"

  @smoke
  Scenario: Driver is found
    Given I am on the finding your driver screen
    When a driver accepts the trip
    Then I should see "Driver is on the way"
    And I should see the driver's vehicle on the map

  Scenario: No driver found
    Given I am on the finding your driver screen
    When no driver accepts within the search window
    Then I should see "No driver found nearby you!"

  Scenario: Booking request timeout
    Given the booking request does not complete in time
    Then I should see "Ride booking request timeout!"

  Scenario: Cancel while finding a driver
    Given I am on the finding your driver screen
    When I tap "Cancel trip"
    Then I should see "Cancel trip?"
    When I tap "Yes, cancel"
    Then I should see "Trip cancelled by you!"

  Scenario Outline: Cancel after driver assigned with a reason
    Given a driver is assigned to my trip
    When I tap "Cancel trip"
    Then I should see "Why do you want to cancel?"
    When I select "<reason>"
    And I tap "Yes, cancel"
    Then the trip is cancelled

    Examples:
      | reason                  |
      | Wait time too long      |
```

```
    | Driver asked me to cancel|
    | Ride no longer needed    |

Scenario: Keep the trip
  Given the cancel trip dialog is open
  When I tap "Keep trip"
  Then the trip continues

Scenario: Driver arrives at pickup
  Given the driver is on the way
  When the driver arrives at pickup
  Then I should see "Driver has arrived"
  And I should see "Meet at pickup spot"

Scenario: Trip starts
  Given the driver has arrived
  When the driver starts the trip
  Then I should see "Heading to destination"
  And I should see the drop-off ETA

Scenario: Driver cancels the trip
  Given a driver is assigned to my trip
  When the driver cancels
  Then I should see "Trip cancelled by driver!"
  And I should see "Rebook"

Scenario: Trip completes and rating
  Given my trip is in progress
  When the trip completes
  Then I should see "How was your ride with <driver name>?"
  When I give 5 stars
  And I select compliment "Drove safely"
  And I tap "Done"
  Then the rating is submitted

Scenario: Low rating with complaint
  Given the rating screen is shown
  When I give 2 stars
  Then I should see "What went wrong?"
  When I select "Late pickup"
  And I enter comment "Driver was 15 minutes late"
  And I tap "Done"
  Then the complaint is submitted

Scenario Outline: Tipping the driver
  Given the rating screen is shown
  When I tap "Add a tip"
  And I enter custom amount "<amount>"
  Then I should see "<result>"

  Examples:
    | amount | result                            |
    | 5      | Save · $5.00                      |
    | 150    | The maximum tip amount is $100.   |

Scenario: Chat with driver
  Given a driver is assigned to my trip
  When I open the message screen
  And I send "I'm at the front door"
  Then the message appears in the chat
```

## 04_co_commute.feature

```
@co-commute
Feature: Co-Commute
  As a rider
  I want to share commutes with neighbours
  So that I can split gas costs

  Background:
    Given I am signed in with a default payment method
    And location permission is granted
    And I am on the "Co-Commute" tab

  @smoke
  Scenario: View nearby journeys
    Then I should see "Nearby journeys"
    And each journey shows leave time and seats left

  Scenario: Nearby journeys without location
    Given location permission is denied
    Then I should see "Turn on location to find nearby journeys."

  Scenario: Empty nearby journeys
    Given there are no nearby journeys
    Then I should see "No nearby journeys right now. Pull to refresh."

  Scenario: Search journeys
    When I tap "Search journeys"
    And I select a pickup and dropoff location
    Then I see journeys matching my route

  @smoke
  Scenario: Book a seat
    Given a journey with seats available is listed
    When I open the journey
    And I tap "Book a seat"
    Then I should see "Seat booked. About $1 is held, not charged."
    And the booking appears in "My bookings"

  Scenario: Seat already taken
    Given another rider books the last seat before me
    When I tap "Book a seat"
    Then I should see "That seat was just taken. Pull to refresh and pick another journey."

  Scenario: Card declined on booking
    Given my default card will be declined
    When I tap "Book a seat"
    Then I should see "Your card was declined. Update your payment method and try again."

  Scenario: Journey full
    Given a journey has no seats left
    Then it shows "Full"
    And "Book a seat" is unavailable

  Scenario: Booking requires default payment method
    Given I have no default payment method
    When I tap "Book a seat"
    Then I should see "Set a default payment method to continue."

  Scenario: Cancel a booking
    Given I have a confirmed booking
    When I open the booking details
    And I tap "Cancel booking"
    And I tap "Yes, cancel"
    Then I should see "Booking canceled"

  Scenario: Post a commute request
    When I tap "Plan a Co-Commute"
    And I set pickup, dropoff and a leave time
    And I tap "Post commute"
    Then I should see "Your commute is posted"
    And it appears in "My requests" with status "Open"

  Scenario: Post without leave time
```

```
    Given I am planning a co-commute
    When I continue without a leave time
    Then I should see "Choose a leave time"

  Scenario: Cancel a posted commute
    Given I have an open commute request
    When I tap "Cancel request"
    Then I should see "Cancel this commute?"
    When I tap "Yes, cancel"
    Then I should see "Your commute request was canceled"

  Scenario: View booking details
    Given I have a booking
    When I open "Booking details"
    Then I should see status, driver, price breakdown and booking ID
    And the platform fee shows "Held, not charged"

  Scenario: Contact driver from booking
    Given I have a confirmed booking
    When I tap "Call"
    Then the phone app opens with the driver's number
```

## 05_trips.feature

```gherkin
@trips
Feature: Trips history and scheduled rides
  As a rider
  I want to see upcoming and past trips
  So that I can manage rides and get receipts

  Background:
    Given I am signed in as a rider
    And I open the "Trips" tab

  Scenario: No upcoming trips
    Given I have no scheduled trips
    Then I should see "No upcoming trips"
    And I should see "Schedule a ride"

  Scenario: View upcoming scheduled trip
    Given I have a scheduled trip for tomorrow
    Then I should see "UPCOMING RIDE"
    When I tap "View details"
    Then I should see "Your ride is reserved"
    And I should see "Fare estimate" and "Payment method"

  Scenario: Cancel scheduled ride
    Given I am viewing a scheduled trip more than 1 hour before pickup
    When I tap "Cancel ride"
    Then the scheduled trip is cancelled with no fee

  Scenario Outline: Filter past trips
    Given I have past trips with different statuses
    When I select the "<filter>" filter
    Then I only see trips matching "<filter>"

    Examples:
      | filter    |
      | All       |
      | Completed |
      | Canceled  |

  @smoke
  Scenario: Open trip receipt
    Given I have a completed past trip
    When I open the trip
    Then I should see "Trip receipt"
    And I should see "Fare breakdown" and "Total fare"
    And I should see the route map

  Scenario: Get help from receipt
    Given I am viewing a trip receipt
    When I tap "Get help with this trip"
    Then I should see the help screen for that trip

  Scenario: Rebook a past trip
    Given I am viewing a completed trip
    When I tap "Rebook"
    Then pickup and drop-off are prefilled from that trip
```

## 06_account_profile_settings.feature

```
@account
Feature: Account, profile and settings
  As a rider
  I want to manage my profile and preferences

  Background:
    Given I am signed in as a rider
    And I open the "Account" tab

  Scenario: View profile
    When I tap "View profile"
    Then I should see "Legal Name", "Phone" and "Email"

  Scenario: Edit profile
    Given I am on the edit profile screen
    When I change preferred name to "JD"
    And I tap "Update"
    Then I should see "Updated successfully!"

  Scenario: Invalid preferred name
    Given I am on the edit profile screen
    When I change preferred name to "@@"
    And I tap "Update"
    Then I should see "Preferred name is not valid"

  Scenario: Update profile photo
    When I choose a new profile photo
    Then I should see "Profile photo updated!"

  Scenario: Add a saved place
    Given I open "Saved Places"
    When I tap "Add new place"
    And I enter name "Gym" and select an address suggestion
    And I tap "Save"
    Then I should see "Gym is saved."

  Scenario: Saved place requires all fields
    Given I am on the add new place screen
    When I tap "Save" with empty fields
    Then I should see "Please fill all fields and select an address from suggestions"

  Scenario: Edit and delete a saved place
    Given I have a saved place "Gym"
    When I open "Edit saved place"
    And I tap "Delete"
    Then "Gym" is removed from saved places

  Scenario Outline: Change app language
    Given I open "Settings"
    When I open "Language"
    And I select "<language>"
    Then I should see "Language updated to <language>"

    Examples:
      | language        |
      | Spanish         |
      | French (Canada) |
      | English (US)    |

  Scenario: Notification preferences require one channel
    Given I open notification preferences for "Receipts"
    When I turn off all of "Email", "Push" and "SMS"
    Then I should see "At least one option must be activated."

  Scenario: Check for app update
    Given I open the app update screen
    When I tap "Check for update"
    Then I should see "You're on the latest update." or "Update ready"

  Scenario: Logout
    When I tap "Logout"
    Then I am returned to the landing screen
```

```
Scenario: Delete account
  When I tap "Delete Account"
  Then I should see "Confirm Account Deletion"
  When I confirm
  Then my account is deleted and I am signed out
```

## 07_payment.feature

```
@payment
Feature: Payment methods
  As a rider
  I want to manage payment methods

  Background:
    Given I am signed in as a rider
    And I open "Payment Methods"

  Scenario: No payment methods
    Given I have no saved cards
    Then I should see "Add a payment method"

  @smoke
  Scenario: Add a credit card
    When I tap "Add payment method"
    And I select "Credit or debit card"
    And I enter valid card details
    And I tap "Add card"
    Then I should see "Payment method added successfully!"

  Scenario: Add an invalid card
    When I add a card with invalid details
    Then I should see "Payment failed. Please double-check your card details and try again."

  Scenario: Set primary card
    Given I have two saved cards
    When I open the second card
    And I tap "Set as primary"
    Then the second card is marked "Primary"

  Scenario: Remove a card
    Given I have a saved card
    When I open the card
    And I tap "Remove payment method"
    Then the card is removed from the list

  Scenario: Remove card fails
    Given the server rejects card deletion
    When I remove a card
    Then I should see "Failed to delete card. Please try again."

  Scenario Outline: Wallet payment options by platform
    Given I am on a "<platform>" device
    When I tap "Add payment method"
    Then I should see "<wallet>"

    Examples:
      | platform | wallet     |
      | iOS      | Apple Pay  |
      | Android  | Google Pay |

  Scenario: Load payment methods failure
    Given the payment service is unavailable
    Then I should see "Couldn't finish loading"
    When I tap "Retry"
    Then payment methods are reloaded
```

## 08_wallet.feature

```
@wallet
Feature: Wallet and payouts
  As a rider
  I want to see my HOVR balance and withdraw it

  Background:
    Given I am signed in as a rider
    And I open "Wallet"

  Scenario: Empty balance
    Given my balance is zero
    Then I should see "No balance yet"

  Scenario: View balance breakdown
    Given I have a balance
    Then I should see "Available", "Pending" and "Locked"

  Scenario: Withdraw available balance
    Given my available balance is above the minimum payout
    And I have banking details set up
    When I tap "Withdraw available balance"
    And I tap "Confirm withdrawal"
    Then I should see "Withdrawal requested"
    And the payout appears in "Payout history" with status "Pending"

  Scenario Outline: Withdrawal blocked
    Given <condition>
    When I tap "Withdraw available balance"
    Then I should see "<message>"

    Examples:
      | condition                              | message                                                |
      | my balance is below the minimum payout | Your available balance is below the minimum payout.    |
      | I have no banking details              | Add or finish your banking details to withdraw.        |
      | a payout is already in progress        | A payout is already in progress.                       |

  Scenario: View payout details
    Given I have a past payout
    When I open it from "Payout history"
    Then I should see "Amount", "Status" and "Payout ID"
```

## 09_refer_and_earn.feature

```
@referral
Feature: Refer and earn
  As a rider
  I want to invite friends
  So that I can earn rewards

  Background:
    Given I am signed in as a rider
    And I open "Refer and earn"

  Scenario: Copy referral link
    When I tap the referral link
    Then I should see "Copied to clipboard!"

  Scenario: Share referral link
    When I tap "Share with Rider"
    Then the system share sheet opens with my invite link

  Scenario: Redeem a referral code
    When I tap "Enter a referral code"
    And I enter "FRIEND5"
    And I tap "Redeem"
    Then I should see "Redeemed successfully!"

  Scenario: Redeem with empty code
    Given I am on the redeem referral code screen
    When I tap "Redeem" without a code
    Then I should see "Enter the referral code!"

  Scenario: Empty referral progress
    Given I have not referred anyone
    When I open "Referral progress"
    Then I should see "No referrals yet"

  Scenario: Referral progress tracking
    Given my friend has completed 1 of 3 rides
    When I open "Referral progress"
    Then I should see "1/3 rides"
```

## 10_notifications_inbox.feature

```
@notifications
Feature: Notifications and inbox
  As a rider
  I want to receive and read trip and promo messages

  Background:
    Given I am signed in as a rider

  Scenario: Empty inbox
    Given I have no messages
    When I open "Inbox"
    Then I should see "You’re all caught up."

  Scenario: Open a notification
    Given I have a trip notification
    When I open "Inbox"
    And I tap the notification
    Then I should see the notification details

  Scenario: Push notification for driver arrival
    Given I have an active trip
    And the app is in the background
    When the driver arrives
    Then I receive a push notification
    When I tap the notification
    Then the app opens on the active trip screen

  Scenario: Arrival notification
    Given my trip reaches the destination
    Then I should see "You have arrived at your destination."
```

## 11_help_support.feature

```
@help
Feature: Help and support
  As a rider
  I want to find answers and contact support

  Background:
    Given I am signed in as a rider
    And I open "Help"

  Scenario: Browse FAQ categories
    Then I should see "App and features", "Account and data" and "Payments and pricing"
    When I open "How to cancel a trip"
    Then I should see the FAQ article

  Scenario: Search help
    When I search "receipt"
    Then I should see "I can’t find my receipt" in results

  Scenario: No open tickets
    Given I have no support tickets
    When I open "Support tickets"
    Then I should see "No open tickets"

  @smoke
  Scenario: Create a support ticket
    When I tap "New ticket"
    And I enter subject "Driver didn't arrive"
    And I enter description "Waited 20 minutes, driver never came."
    And I tap "Create ticket"
    Then I should see "Ticket created"

  Scenario Outline: Ticket form validation
    Given I am on the create ticket screen
    When I enter subject "<subject>" and description "<description>"
    And I tap "Create ticket"
    Then I should see "<message>"

    Examples:
      | subject              | description          | message                    |
      |                      | Some detail here ok  | Enter a subject            |
      | Hi                   | Some detail here ok  | Use at least 5 characters  |
      | Driver didn't arrive |                      | Describe the issue         |

  Scenario: Reply to a ticket
    Given I have an open ticket
    When I open it
    And I send reply "Any update?"
    Then the reply appears in the conversation

  Scenario: Helpdesk unreachable
    Given the helpdesk server is unreachable
    When I open "Support tickets"
    Then I should see "Could not reach the helpdesk server. Try again."
```
